Against Abuse of Women

Dear Member of Congress:

The devastating earthquake in Pakistan has claimed over 20,000 lives, thousands more are believed to be buried underneath the rubble. The gravity of the tragedy is exacerbated by the knowledge that a majority of casualties are young children who were in school at the time of the earthquake.

As you well know, Pakistan has few resources available to carry out proper rescue efforts for the victims of the earthquake. The lack of proper search and rescue teams, sniffing dogs and other rescue technology is likely to make an already catastrophic situation even worse.

I am writing thus to urge you to ask the United States Congress to send search and rescue teams, airlift rescue equipment and other disaster relief resources to Pakistan. This is an incredible opportunity for our country to win the hearts of Pakistanis and help them in their hour of need. As your constituent, I urge you to send help to the Pakistani people as soon as possible.

Sincerely,

Your constituent
